INSTRUCTIONS FOR ADDING OR REMOVING BRACELET LINKS:

Turn over the watch to look for arrows on the underside of the links, showing you which way you need to push the pin out of the link. Use a pin remover tool, or something similar, to push out the steel pin from the hole located on the other side of the link. When pin is visible from the other side, use pliers to pull it out. After the links are removed, simply follow these steps in reverse to re-assemble the bracelet.
